The upholstered seat for a vehicle has a ventilation system (13,14) at the upholstery (11) with one or more fans (14). The fans draw in ambient air to be passed directly or indirectly through a cooling unit (13) to set the temp. of the upholstery (11). The ventilation system (13,14), at the seat backrest, is between the backrest upholstery (11) and the rear cover (12) for the backrest, as a modular unit with the backrest rear cover (12).
